- + Fixed the occasional inconsistency in the scan results of outdated software and drivers
- + Supports 37 localized languages
- + And more can be discovered by you

Description:

Advanced SystemCare is an all-in-one yet easy-to-use utility to clean, optimize, speed up, and protect your PC, as well as guard your privacy.

Extremely Easy to Use

With the clean, intuitive, and informative UI, Advanced SystemCare can be easily navigated without a second thought, even for beginners. Besides, the flexible and customizable settings make everything within your reach and control.

Clean Your PC with 1-Click

Your computer may accumulate a large number of useless, temporary, and duplicate files over time. Want to clean them to help your old PC breathe a new life? The powerful 1-click AI Mode can do it for you easily. Based on your cleaning and optimizing habits and your PC's performance status, it can make a personalized scan and fix solution for your PC.

While, if you want to take control and decide how to clean and optimize your computer by yourself, you can choose the comprehensive Manual Mode. It allows you to tune up your PC freely according to your special needs, including sweeping privacy traces, removing spyware, cleaning up junk files, leftovers, invalid/broken registry entries, and invalid shortcuts, updating outdated programs and drivers, accelerating Internet speed, fixing disk errors, system weaknesses, and security holes, and enabling antivirus & firewall protections.

Speed Up Your PC and Network

Is your computer stuck or slow to respond? Are you suffering from sluggish file downloading or video streaming? It's time to make some changes now.

Advanced SystemCare is your unmissable choice. It delivers plenty of features to speed up your PC and accelerate your Internet, for example, disabling unnecessary startup items to make your PC boot faster; stopping unnecessary program processes, scheduled tasks, and background services to make your PC run smoother and respond faster; monitoring system resources like RAM/CPU/Disk usage, CPU/GPU/Mainboard temperature, and fan speed in real time, and letting you quickly end the processes with high RAM/CPU/Disk usage to boost your PC; updating hardware drivers to avoid system crashes, freezing screens, and device issues; updating outdated software to eliminate security vulnerabilities and to let you enjoy those software's latest features at the earliest time; and accelerating your network and browsers in an all-around way to make you surf online freely and free you from being bombarded with annoying ads.

Protect Your System and The Data You Care About

In addition to cleaning up and speeding up your PC, Advanced SystemCare also secures your computer system. It helps you easily enable antivirus & firewall protections to protect your system against viruses or attacks. The Anti-Spyware feature with a huge database can detect and remove various threats, not only the widespread ones but also the emerging and hidden ones.

Do you think Advanced SystemCare only protects your system? No! It also cares about your personal data because it knows your privacy is the top priority. It can create a safer world for you by clearing your privacy traces including saved passwords, disguising your online identity and activities to avoid digital fingerprints being stolen, blocking unauthorized access to your sensitive data, preventing phishing scams, suspicious emails, and annoying ads, and even alerting you about homepage & search engine modifications.

20+ Handy Tools

If you think Advanced SystemCare only has the features above, you may not know it fully. It still offers 23 effective tools, such as Smart RAM which monitors memory usage and releases them automatically, Internet Booster which optimizes the network settings and popular browsers like Firefox, Edge, and Opera to accelerate the Internet connection, Win Fix which analyzes system issues and fix them, FaceID which catches the intruders who secretly access your PC and informs you, Large File Finder which locates the big files that occupy your valuable disk space and helps you delete the useless ones easily, and DNS Protector which prevents malware from modifying your system DNS settings.

In Short

Advanced SystemCare is a capable, flexible, and reliable PC utility with tangible benefits for both old and new PCs. It can help you unlock the full potential of your PC and deliver you an unprecedented experience of a faster and safer PC.
