Description:

IObit Malware Fighter is a powerful and comprehensive anti-malware and anti-virus program that can protect your PC against the latest spyware, adware, ransomware, Trojans, keyloggers, bots, worms, hijackers, viruses, etc. With the continually enhanced IObit Anti-malware Engine, the upgraded latest Bitdefender Engine, the more powerful IObit Anti-ransomware Engine, and the larger database, IObit Malware Fighter accelerates the scanning process by up to 32%, reduces the resource usage by up to 50%, detects more hidden threats, and gives you the best protection ever. Check out the main features to know more about how IObit Malware Fighter offers such real-time all-around protection for your privacy, browsers, and the whole system.

Features and Highlights

Triple Engine Protection

IObit Malware Fighter combines three engines (IObit Anti-malware Engine, the world-leading Bitdefender Engine, and IObit Anti-ransomware Engine) together to defend against the virus, malware, or ransomware attacks and maximize your PC protection. With multiple layers of malware-crushing tech, IObit Malware Fighter empowers you to enjoy the internet fearlessly.

Safe Box & Sensitive Data Protect - No Worries About Privacy Leaks

To fully protect your private and sensitive data from unauthorized access and the latest ransomware attacks in real-time, IObit Malware Fighter provides you with two powerful features: Sensitive Data Protect (Under Anti-ransomware Engine) and Safe Box. Just select the file types or add the precise files/folders you want to protect. Then no more worries about your sensitive data being attacked by hackers or illegally accessed by third-party programs. No one can access your protected data in Safe Box without the correct password.

Sandbox - An Isolated Safe Environment to Avoid Potential Threats

Sandbox is an isolated testing environment that enables you to execute unknown programs or open files without damaging your system or network. Using a sandbox to detect malware offers an additional layer of protection against security threats, such as stealthy attacks.

Powerful Browser Protection

IObit Malware Fighter offers you comprehensive browser protections, including homepage protection, anti-tracking, download protection, DNS protection, and surfing protection. What's more, it also adds Email Protection and Ads Removal to fully protect your browsing against online threats, phishing attacks, cryptocurrency mining, annoying ads, and Email-borne threats for safer & smoother surfing.

Real-time Protection - 8 Security Guards

With 8 guards in Security Guard, IObit Malware Fighter takes your PC security to a higher level. The 8 guards refer to Network, File, Startup, Process, MBR, Camera, USB, and Behavior, which protect every corner of your PC real-timely. It is worth mentioning that Camera Guard can protect your camera from unauthorized access for better privacy protections and Behavior Guard can prevent suspicious threats in advance based on behavior analysis and keep you away from potential threats.

Conclusion

If you need the all-around security software to protect your privacy, online security, and your system, IObit Malware Fighter is one that you cannot miss.
