- + And more can be discovered by you

Description:

Advanced SystemCare is an all-in-one but easy-to-use application that optimizes, cleans up, speeds up, and protects your computer while also safeguarding your privacy.

Extremely Easy to Use

With the neat, informative, and intuitive user interface, Advanced SystemCare is so simple and easy to use that even beginners can use it without thinking twice. In addition, its flexible and customizable settings keep everything under your control.

Clean Your PC with 1-Click

Over time, your computer may accumulate a large number of worthless, duplicate, and temporary files. Do you want to clean them so that your old PC can breathe a new life? Both the intelligent AI Mode scan and the 1-click PC Health Checker can do it for you easily. AI Mode scan offers you a personalized scan and an automatic fix for your PC based on your PC's performance status and your cleaning and optimizing habits. PC Health Checker helps you

diagnose your PC health with 1-click and then fix the performance & security issues to bring you a fresh and secure PC.

If you wish to clean and optimize your computer on your own, you can use the comprehensive Manual Mode scan. It enables you to freely tune up your PC as per your specific needs, such as sweeping privacy traces, removing spyware, cleaning up junk files, leftovers, invalid/broken registry entries, and invalid shortcuts, updating outdated programs and drivers, accelerating Internet speed, fixing disk errors, system weaknesses, and security holes, and enabling antivirus & firewall protections.

Speed Up Your PC and Network

Does your computer respond slowly or even get stuck? Are you experiencing slow file downloads or video streams? It's time to make some improvements now.

Advanced SystemCare is the best choice you can't miss. It provides many useful features that will help you speed up your PC and Internet connection: disable unneeded startup items to make your computer boot faster; stop unnecessary processes, scheduled tasks, and background services to make your computer run smoother; monitor CPU/RAM/disk usage, GPU/CPU/motherboard temperature, fan speed, and other system resources in real time, and allow you quickly end the processes with high CPU/RAM/disk usage to get your PC respond faster; update outdated drivers to avoid device issues and system crashes; update outdated programs to avoid security holes and meanwhile let you enjoy the latest features of these programs at the earliest time; and fully optimize your Internet configurations to accelerate your network speed.

Protect Your System and The Data You Care About

In addition to cleaning up and speeding up your computer, Advanced SystemCare still safeguards your PC system. It helps you easily enable antivirus and firewall protections to protect your system from viruses and attacks. The Anti-spyware function can detect and eliminate a wide range of threats: not only widespread threats but also emerging and hidden threats.

Do you think that Advanced SystemCare only provides protection for your computer? No! Advanced SystemCare also cares about your personal information as it knows that privacy comes first. It can create a safer world for you by erasing your privacy traces like browsing cache, cookies, and saved passwords, hiding your online identity and activities to prevent digital fingerprints from being stolen, preventing unauthorized access to your sensitive data, avoiding phishing scams, suspicious emails, and obtrusive ads, and even alerting you about homepage & search engine changes.

20+ Handy Tools

If you think Advanced SystemCare simply offers the functions listed above, you might not fully understand it. It also provides 23 handy tools, such as Smart RAM - keeps an eye on memory usage and releases RAM automatically; Internet Booster - speeds up the Internet connection by optimizing the settings of the network and popular browsers like Firefox and Edge; Win Fix - analyzes system problems and fixes them; FaceID - detects unauthorized users of your PC and notifies you; Large File Finder - finds large files that take up your valuable disk space and allows you to delete the useless ones; and DNS Protector - prevents malware from modifying your system DNS settings.

Summary

Advanced SystemCare is a powerful, flexible, and reliable PC utility that delivers tangible benefits to both old and new PCs. It helps you unlock the full potential of your PC and brings you an unparalleled experience with a faster and more secure computer.
