+ Performance Monitor - Adopt the latest world-renowned temperature acquisition technology for more accurate GPU/CPU/motherboard temperatures
+ AutoCare - Automatically clean up more useless items to improve system performance
+ 37 localized languages
+ And more can be discovered by you

Description:
Advanced SystemCare is an all-in-one yet easy-to-use utility for Windows computers. It can clean up, speed up, optimize, and protect your PC, as well as safeguard your privacy.

Extremely Easy to Use
With its clean, intuitive, and informative user interface, Advanced SystemCare allows even beginners to navigate it without hesitation. Besides, the flexible and adjustable settings put everything in your hands and under your control.

Clean Your PC with 1-Click
Over time, your computer may amass a large number of files that are worthless, transient, or duplicate. Do you want to clean them to give your old PC a new life? Both the smart AI Mode cleaning and the 1-click PC Health Checker can do it for you quickly and easily. The AI Mode cleaning offers a personalized scan and repair according to your cleaning and optimizing habits and your computer's performance. PC Health Checker diagnoses the health of your PC with a single click and then resolves the performance and security issues to give you a new and secure PC.

Of course, if you'd like to take control and select how to clean and optimize your computer, you can choose the powerful and comprehensive Manual Mode. It lets you freely tune up your PC based on your specific requirements, including erasing privacy traces, removing spyware, cleaning junk files, leftovers, invalid/broken registry entries, and invalid shortcuts, updating outdated drivers and programs, increasing Internet speed, fixing disk errors, system weaknesses, and security holes.

Speed Up Your PC and Network
Does your computer respond slowly or even freeze frequently? Do you experience slow file downloading or video streaming? It's time for a change now. Advanced SystemCare is your unmissable choice.

It provides a variety of functions to speed up your PC and Internet, for example, disabling unneeded startup items to make your PC boot faster; stopping unwanted software processes, scheduled tasks, and background services to make your PC run smoother; monitoring system resources such as RAM/CPU/Disk consumption, CPU/GPU/Mainboard temperature, and fan speed in real time, and allowing you to rapidly stop processes with high RAM/CPU/Disk usage to speed up your PC; updating device drivers to avoid system crashes, freezing screens, and device issues; updating outdated software to eliminate security vulnerabilities and allow you to enjoy the latest features of those software at the earliest time; and accelerating your network and browsers to bring you a smooth browsing experience.

Protect Your System and The Data You Care About
In addition to speeding up and cleaning up your PC, Advanced SystemCare also protects your PC's system from viruses and attacks with the easiest way to enable Antivirus and Firewall. Besides, its Anti-spyware feature can detect and eliminate a wide range of threats, including widespread threats, emerging threats, and hidden threats.

Does Advanced SystemCare only protect your PC's system? No! It also cares about your personal data on your computer and your online activities because it understands that your privacy is the most important. With Privacy Protection and Browser Protection, Advanced SystemCare helps prevent unauthorized accesses to

your personal data, erase your privacy traces, block phishing scams, suspicious emails, and other browser-based risks, remind you of homepage and search engine modifications, block annoying ads, and hide your real online identity and activities by masking your digital fingerprint to bring you a secure and private browsing experience.

20+ Handy Tools
If you think Advanced SystemCare only has the above features, you may not know enough about it. It also offers 23 handy tools, such as Smart RAM which monitors memory usage and automatically releases it, Internet Booster which optimizes network settings and popular browsers like Firefox, Edge, and Opera to speed up the Internet connection, Win Fix which detects system issues and fixes them, FaceID which catches the intruders who secretly access your PC and notifies you, Large File Finder which locates large files that occupy your valuable disk space and allows you to delete the unnecessary ones effortlessly, and DNS Protector which prevents malware from changing your system DNS settings.

In Short
Advanced SystemCare is a comprehensive yet intuitive system optimization tool for maximizing the performance of both old and new PCs, as well as a powerful and reliable guard for protecting your system and privacy.
