* And more can be discovered by you

Description：
Advanced SystemCare Ultimate is a robust and comprehensive security and performance utility for Windows computers. It offers a one-stop solution for protecting your PC against viruses, ransomware, and other malware while cleaning, optimizing, and speeding up your PC.

Extremely Easy to Use
With a clean, intuitive, and informative user interface, Advanced SystemCare Ultimate allows even beginners to navigate it without hesitation. Besides, the flexible and adjustable settings put everything in your hands and under your control.

Protect Your PC from Various Threats
With the world-leading Bitdefender antivirus engine and the upgraded IObit anti-ransomware engine, Advanced SystemCare Ultimate takes your computer security to the next level. It not only protects your computer from common threats like viruses, malware, spyware, adware, trojans, keyloggers, bots, worms, and hijackers, but also removes even new and emerging threats. Additionally, Advanced SystemCare Ultimate can safeguard your files from being encrypted by ransomware.

Secure Your Private Data and Keep You Safe Online
Does Advanced SystemCare Ultimate only protect your PC's system? No! It also cares about your personal data on your computer and your online activities because it understands that your privacy is the most important. With enhanced Privacy Protection and Browser Protection, Advanced SystemCare Ultimate helps prevent unauthorized accesses to your personal data, erase your privacy traces, block phishing scams, suspicious emails, and other browser-based risks, remind you of homepage and search engine modifications, block annoying ads, and hide your real online identity and activities by masking your digital fingerprint to bring you a secure and private browsing experience.

Clean Your PC with 1-Click
Over time, your computer may amass a large number of files that are worthless, transient, or duplicate. Do you want to clean them to give your old PC a new life? The intelligent 1-click AI Mode cleaning can do it for you quickly and easily. It can offer you a personalized scan and repair for your PC according to your cleaning and optimizing habits and your computer's performance. Of course, if you'd like to take control and select how to clean and optimize your computer on your own, you can choose the powerful and comprehensive Manual Mode. It lets you freely tune up your PC based on your specific requirements, including erasing privacy traces, removing spyware, cleaning junk files, leftovers, invalid/broken registry entries, and invalid shortcuts, updating outdated drivers and programs, increasing Internet speed, fixing disk errors, system weaknesses, and security holes.

Speed Up Your PC and Network
Does your computer respond slowly even frequently freeze? Do you experience slow file downloading or video streaming? It's time for a change now. Advanced SystemCare Ultimate is an unmissable choice. It provides a variety of functions to speed up your PC and Internet, for example, disabling unneeded startup items to make your PC boot faster; stopping unwanted software processes, scheduled tasks, and background services to make your PC run smoother; monitoring system resources such as RAM/CPU/Disk consumption, CPU/GPU/Mainboard temperature, and fan speed in real time, and allowing you to rapidly stop processes with high RAM/CPU/Disk usage to speed up your PC; updating device drivers to avoid system crashes, freezing screens, and device issues; updating outdated software to eliminate security vulnerabilities and allow you to enjoy the latest features of those

software at the earliest time; and accelerating your network and browsers to bring you a smooth browsing experience.

20+ Handy Tools

If you think Advanced SystemCare Ultimate only has the above features, you may not know enough about it. It also offers 23 handy tools, such as Smart RAM which monitors memory usage and automatically releases it, Internet Booster which optimizes network settings and popular browsers like Firefox, Edge, and Opera to speed up the Internet connection, Win Fix which detects system issues and fixes them, FaceID which catches the intruders who secretly access your PC and notifies you, Large File Finder which locates large files that occupy your valuable disk space and allows you to delete the unnecessary ones effortlessly, and DNS Protector which prevents malware from changing your system DNS settings.

In Short

Advanced SystemCare Ultimate is a top-tier and preferred antivirus software for protecting your system and privacy, as well as a capable and dependable system optimization tool for maximizing the performance of your PC.
