- + Strengthened Privacy Sweep - Sweep more privacy traces to better protect your privacy
- + Optimized AutoCare - Smarter automatic cleanup for higher PC performance
- + Updated 37 languages

+ And more can be discovered by you

### **Description:**

Advanced SystemCare Ultimate is a powerful and all-encompassing utility designed to safeguard your Windows computer and optimize its performance. It delivers you a one-stop solution: protecting your PC's system from viruses, ransomware, and other malware, while simultaneously cleaning, optimizing, and accelerating your PC.

### **Extremely Easy to Use**

Featuring a clean, intuitive, and information-rich user interface, Advanced SystemCare Ultimate lets even beginners navigate its functions without confusion. What's more, its flexible and adjustable settings give you complete control over the software, allowing you to customize it based on your specific needs.

### **Protect Your PC from Various Threats**

Powered by the world-leading Bitdefender antivirus engine and the upgraded IObit anti-ransomware engine, Advanced SystemCare Ultimate elevates your computer's security to a new level. It not only defends against common threats like viruses, malware, spyware, adware, trojans, keyloggers, bots, worms, and hijackers, but also eliminates newly emerging risks. Furthermore, it safeguards your files from being encrypted by ransomware attacks.

### **Secure Private Data and Ensure Safe Online Experiences**

Does Advanced SystemCare Ultimate only focus on protecting your PC's system? No! It also prioritizes protecting the personal data stored on your computer and your online activities because it recognizes that privacy is your most valuable asset. Equipped with enhanced Privacy Protection and Browser Protection, Advanced SystemCare Ultimate helps you prevent unauthorized accesses to your personal data, erase traces of your online activities, block phishing scams and suspicious emails, and reduce other browser-based risks. It also alerts you about unwanted changes to

your homepage or search engine, blocks annoying ads, and hides your real online identity by masking your digital fingerprint, delivering you a secure and private browsing experience.

### **Clean Your PC with 1-Click**

Over time, your computer accumulates large volumes of temporary data and duplicate files. If you want to clean these useless files to revitalize your aging PC, the intelligent 1-click AI Mode scan can handle the task quickly and easily. Based on your cleaning/optimization habits and your computer's performance, it provides a personalized scan and repair. Of course, if you prefer to customize the cleaning and optimization process, you can use the powerful and comprehensive Manual Mode. This mode lets you fine-tune your PC according to your specific needs: erasing privacy traces; removing spyware; clearing junk files, leftovers, invalid/broken registry entries, and invalid shortcuts; updating outdated drivers and programs; boosting Internet speed; and fixing disk errors, system vulnerabilities, and security holes.

### **Speed Up Your PC and Network**

Does your computer respond slowly or freeze frequently? Do you face delays in file downloads or video streaming? It's time for a change! Advanced SystemCare Ultimate is an unmissable choice. It offers various features to boost your PC and Internet speed: disable unnecessary startup items to shorten the boot time; stop unwanted software processes, scheduled tasks, and background services; monitor system resources (RAM/CPU/disk usage, CPU/GPU/mainboard temperature, and fan speed) in real time, and quickly end high-resource processes; update device drivers to prevent screen freezes, system crashes, or device malfunctions; update outdated software to let you enjoy their latest features and eliminate security vulnerabilities; and optimize networks and browsers for a faster browsing experience.

### **20+ Practical Tools**

If you think Advanced SystemCare Ultimate only has the features above, you're missing out. It also includes 23 handy tools such as Smart RAM: monitors memory usage and automatically frees up ram; Internet Booster: optimizes network settings and popular browsers to speed up their connections; Win Fix: detects and resolves system issues; FaceID: catches intruders who access your PC secretly and sends you notifications; Large File Finder: locates files that take up a lot of disk space and lets you delete unnecessary ones effortlessly; DNS Protector: prevents malware from altering your system's DNS settings.

### **In Short**

Advanced SystemCare Ultimate is a top-tier and preferred antivirus solution for protecting your system and privacy. It's also a reliable and capable system optimization tool to maximize your PC's performance.
