**Description**

As a potent and all-inclusive anti-malware and anti-virus tool, IObit Malware Fighter can detect and crush the latest spyware, adware, ransomware, Trojans, keyloggers, bots, worms, hijackers, viruses, etc. that other antivirus software may overlook. With the upgraded IObit Anti-malware Engine, the latest Bitdefender Engine, the enhanced IObit Anti-ransomware Engine, and the expanded database, IObit Malware Fighter scans your computer quickly, intelligently, and thoroughly while using less resources, and protects your system from a variety of threats, including the most subtle and sneaky variants.

How does IObit Malware Fighter provide such real-time & all-around protections for your browsers, privacy, and the whole system?

**Triple Engine Protection**

To maximize your PC's protection against viruses, malware, and ransomware attacks, IObit Malware Fighter integrates three engines: the industry-leading Bitdefender Engine, the IObit Anti-malware Engine, and the IObit Anti-ransomware Engine. With multiple layers of malware-crushing tech and top-notch virus defense, IObit Malware Fighter empowers you to enjoy the internet fearlessly.

**Safe Box & Sensitive Data Protect - No Need To Fear Privacy Leaks**

Sensitive Data Protect (under the Anti-ransomware Engine) and Safe Box are two strong and helpful protections that IObit Malware Fighter offers you to completely safeguard your private and sensitive data against unauthorized accesses and the most recent ransomware attacks in real time. Simply choose the file types to protect or add the files/folders you want to keep private, and then you do not have to worry about hackers targeting your private information or unauthorized third-party programs accessing them. No one can access your protected data in Safe Box without the right password.

### **Powerful Browser Protection**

You can get complete browser security with IObit Malware Fighter, which includes anti-tracking, download protection, DNS protection, homepage protection, and surfing protection. Additionally, Email Protection and Ads Removal are provided to completely safeguard your browsing against malicious websites, phishing scams, cryptocurrency mining, intrusive advertisements, and email-borne threats for safer & smoother surfing.

### **Real-time Protection - 9 Security Guards**

With 9 guards in Security Guard, IObit Malware Fighter takes your PC security to a higher level. The 9 guards, which continuously safeguard every area of your computer, are Network, File, Startup, Process, MBR, Camera, USB, Behavior, and Browser Password. It is worth mentioning that Browser Password Guard can protect your stored browser passwords from unauthorized accesses, and Behavior Guard can prevent suspicious threats in advance based on behavior analysis and keep you away from potential threats.

### **Conclusion**

IObit Malware Fighter is an essential tool for anyone looking for comprehensive and cutting-edge protection for their browsing, privacy, and system. It offers the toughest defense against all kinds of threats.
