- + And more can be discovered by you

Description:

IObit Software Updater is a must-have and easy-to-use program that helps you update outdated software and install essential software safely with only one click.

Larger Software Database

As we know, outdated programs may contain security vulnerabilities, while updating software to the latest version will reduce the risk of vulnerabilities exposed to attackers. IObit Software Updater expands the software database by 30% to support more software updates in this latest version. Besides, IObit Software Updater adds new software categories like AI software and productivity software to help you install more useful programs, making your work and study smarter and more productive.

One-click and Safe Updates

IObit Software Updater saves you a lot of time for updating software. With the one-click solution, you no longer need to manually visit the websites of different distributors one by one. With the more rigorous stability and security software testing, you no longer need to worry about the security and stability of the updated software. In addition, IObit Software Updater also supports multilingual version updates of well-known software such as Mozilla Firefox, WinRAR, Mozilla Thunderbird, and more.

Customized Automatic Updates

IObit Software Updater provides you with a wide variety of update options. You can choose to update programs manually, notify you when updates are available, or update programs in real time. You can also set a specified time to update programs as per your needs.

One-click Installation

In addition to software updates, IObit Software Updater can also help you install necessary programs easily and quickly. Currently, it supports installing hundreds of popular programs in various categories: AI, Productivity, Internet, Security, Multimedia, Runtime, and Utilities & Tools.

Summary

IObit Software Updater is believed to be the first choice when you want to install or update software, especially when you purchase a new computer or have recently reinstalled, formatted, or upgraded your computer.
