What's new:

- + Brand-new Software Health helps manage software permissions, block popup notifications, clean unneeded setup files, and remove malicious software & browser extensions
- + More powerful uninstall engine eliminates residual files more completely with advanced scanning and cleaning algorithms
- + More in-depth Install Monitor can log more items (including startups) created during the installation process for future thorough uninstall
- + 50% larger database supports updating more popular software, including AnyDesk, Calibre, Discord, LibreOffice, and qBittorrent
- + Unique Stubborn Program Remover database supports removing 1000+ stubborn programs
- + Reinforced Force Uninstall+ can easily uninstall programs when uninstall registries are missing
- + Newly added Windows Apps rating helps users know more about removing unwanted Windows Apps
- + Improved the removal process of browser extensions
- + Better UI for more user-friendly experience
- + Two skins: dark and light
- + Supported 37 languages
- + Fully supported Windows 11

Description:

IObit Uninstaller is a perfect uninstall tool. It provides an easy and secure way to remove unwanted programs thoroughly, Windows Apps, Universal Windows Platform (UWP) apps, and malicious/ad browser extensions, giving you a clean PC and a secure & smooth online surfing experience.

The wonderful features in IObit Uninstaller are: Bundlware, Stubborn Programs Remover, Force Uninstall+, Install Monitor, and Software Health.

As the first uninstall utility that comes up with the idea of bundlware removal, IObit Uninstaller has advanced algorithms to detect bundlware when it is just installed, which allows users to uninstall all unwanted bundlware conveniently and timely. Unique Stubborn Program Remover database supports removing 1000+ stubborn programs and ensures all leftovers to be removed thoroughly from the computer just like they've never existed. Force Uninstall+ helps you uninstall programs that cannot be uninstalled in a routine way due to missing uninstall registries or built-in uninstaller errors, and clean all related DLL files easily. Real-time Install Monitor supports logging startups, system services, scheduled tasks, DLL registration, and more other items created during the installation process for future thorough uninstall of the program. Software Health gives users power to manage hidden software permissions, block disturbing popup notifications, clean unneeded setup files, and remove malicious software & browser extensions, making all your software run smoother and reducing security risks.

IObit Uninstaller also supports rating Windows apps, which helps users make a wiser decision when they want to remove unwanted Windows Apps. What's more, the optimized Software Updater now supports updating more popular programs, like AnyDesk, Calibre, Discord, LibreOffice, and qBittorrent.

All in all, IObit Uninstaller is an all-in-one uninstall utility to uninstall programs, bundleware, browser extensions, and Windows Apps for a clean and safe PC.
